06

CYS EN 1916:2002

Product: Reinforced precast concrete pipe for the conveyance of sewage, rainwater and surface water, in pipelines that are generally buried.

Watertightness: No leakage of joint or pipe at 0,5 bar

Crushing Strength: Strength class 120 (Table 8 BS5911-1:2002)

Longitudinal bending strength: Dimensionally adequate

Durability: Adequate for normal serviceability conditions

Durability of joints: Demonstrated according to Method 1
